Humanizing Technologies

To "bring humanity into robotics" and "robots into society", is a central focus at Humanizing Technologies. The company develops software for Public Life Robots and those integrators and is actively shape the market of current and future avatar robotics technologies. Suitable for each customer environment, with Humanizing's international partners they distribute software and offer consulting services for avatar and robotics solutions. The team of Humanizing believes technology is key to break down barriers and reducing labor to support or free up staff in tense times. The company's vision is to create a streamlined and efficient eco-system of smart "humanized" systems, that helps to keep businesses up and running with interactive avatar and robotic solutions.

Founded in 2016, Humanizing Technologies is one of the world's most valued providers of public life robots and robotics software. Spread over different Central Europe locations, they offer customer-centric, sustainable, both ready-to-use and customized solutions. Humanizing Technologies stands for three key values: Enthusiasm. Progress. Humanity.
